The New CHEVROLET Utility 1½ Ton TRUCK

The Six Does Better What the Four did Well

TO the well-known Chevrolet qualities of stamina, dependability and economy, the new Chevrolet Truck adds the further advantages of smooth, six-cylinder operation . . . extra-rugged chassis construction . . . the superb speed and pulling power of a newly-designed four-speed transmission . . . ball-bearing steering mechanism . . . new, four-wheel brakes that are sure and positive in action.

Although it is a better truck, a sturdier truck, a truck that gives true six-cylinder performance . . . this new Chevrolet Utility Truck (with its 1½-ton capacity) is still offered within the price-range of the four.

Ask for a complete performance and maintenance record of this amazing truck . . . and learn how it can save money for you. CT17-S-23C

E. H. PIDGEON,
Buick-Pontiac Motors. Stony Plain.

Traveling with Two-candle Power Lights.

The chance motor vehicle drivers take, on trying to travel the new narrow road on the Baseline without proper lights was well illustrated Thursday last, when three young fellows left Stony Plain about 11 p.m. in an ancient road bug. The boys had been having a good time here, and on deciding to return home, went over to their conveyance which had been anchored in front of a vacant lot, lit the coal oil lamps on the upper-works, and headed out to the main trail. The chugging from their cut-out could be heard over a mile, when this suddenly ceased. A short distance east of Meridian road the bug decided on a nose dive, left the road and hobbled over to the fence. When the late occupants had become unscrambled, one of them headed back to Stony Plain to get a doctor, as one young fellow had received a bad cut back of his head.

The next morning, what had once been a good \$25 chariot was drug back to its shed minus three tires.

Spud Crop Is Light.

The outlook for a potato crop in the Dominion does not appear very favorable this year, according to the Market Examiner. The crop, particularly in the prairie provinces is said to be poor, while B. C. and the eastern part of the Dominion expect only an average yield.

Those in Alberta fortunate enough to get a crop will have a chance, this fall, to be rewarded for their labors.

All of last year's crop has been cleaned up, and the new stocks arriving are in very good condition and bringing a good figure. If the supplies are light, as expected, it looks like a winter for good prices for those having a supply to sell.

About the only shippers from outside points who are likely to come on the Alberta market are those from B.C. As the crop there is only fair, they may need most of their supplies for their own consumption, and very little may be shipped.

Warning to the Public!

In view of the recent decision handed down by Chief Justice Simmons in the action brought by Alex. McLeod against J. D. Hughes and C. Wilson, by which plaintiff was awarded \$1800 damages on the grounds of active concealment of facts as regards the presence of weeds on the lands involved in the transfer; therefore any person dealing in the purchase or sale of farm lands should take this decision as a warning in the transfer of lands infested with noxious weeds that are listed in the Noxious Weeds Act of Alberta or that have proven detrimental to growing crops.

Culpable Negligence

It is becoming, to an ever increasing extent, one of the responsibilities of governmental authorities to protect people against themselves, not only for their own sake, but for the sake of others who, in one way or another, the first may endanger. One of the latest developments in this direction is joint action by the Dominion, Provincial and municipal authorities to lessen the possibility of accidents at level railway crossings. Such crossings are always dangerous, but with the advent of the motor car, and the speed mania of reckless drivers, the death and accident toll has mounted alarmingly.

In nearly one thousand accident cases reported to the Board of Railway Commissioners during the past year, there was danger of loss of life or damage to property because of negligence at highway-railway level crossings. Of these accidents 369 were reported on the lines of the Canadian National system, and railway officials have carefully classified these. It was found that more than forty per cent. of the accidents were caused by some form of downright negligence on the part of the motorist.

Of the huge total of accidents, no less than 325 were cases where vehicles broke or damaged crossing gates which had been lowered; 23 where drivers ignored signals and drove right through gates; 36 cases where drivers passed right ahead under gates which were in process of being raised or lowered; seven cases of driving on to crossings opposite gate which had been lowered; five cases where drivers under the influence of liquor crashed into gates; while three accidents were due to pedestrians climbing over or under gates.

In other words, all these accidents were the result of a wilful disregard of the means of protection provided by the railways. But in their insane desire for speed motorists were responsible for a large number of accidents which were the outcome of what is classified as "inevitable negligence." Some of the almost incredible performances of careless and reckless drivers are listed as follows:

Forty-four motorists drove into the sides of moving trains. Thirty-eight drove into the sides of standing trains. One driver parked on the railway lines while he had a sleep. One tried to drive between two railway cars while switching. He was unsuccessful.

Twelve parked on or too near the railway tracks. Seven went for a drive along the railway tracks—they met express trains.

One driver left his car on the tracks to search for something he had dropped on the road. When he returned there was nothing left of the car. One driver stopped on the railway tracks to adjust his load. Eleven found too late that their brakes needed relining.

This amazing record shows that not only are many accidents at crossings due to sheer negligence and in no way excusable, but they also serve to indicate the nature of the problem of "educating" drivers of motor cars, guilty of such insane conduct. Warning signs and even physical barriers such as crossing gates are no sure guarantee against accidents due to such carelessness.

There appears to be but two methods of putting an end to such accidents. One is to do away with level highway-crossings altogether by carrying highways either over or under the railway tracks. This is a highly expensive business, and is not possible in a country of such immense distances as Canada. It can be done at crossings in all urban centres and at points where traffic is exceptionally heavy, and to this task the Federal Government through the Board of Railway Commissioners, working in co-operation with Provincial Governments and municipal authorities, has decided to bend its energies, the cost of obliterating these level crossings being distributed among these several governmental bodies.

The second course is to licence all drivers of motor cars and to make it an offence for anyone to drive a car unless he or she has such a licence, and to immediately cancel the licence of any person found guilty of negligence, carelessness and recklessness in handling a car. Such persons are a danger not only to themselves, but to the public at large, and in the public interest, should be denied the right to drive such a potential engine of destruction on the public highways as the modern powerful motor car.

Information Wanted

"I've been congratulating the colonel. He's just been appointed warden of one of the largest prisons," said a guest at the banquet. "Really?" replied another. "Tell me—for a job like that do you want influence or does one start as a convict and rise from the ranks!"

Pigeon Versus Telegraph

A carrier-pigeon has had a race with the telegraph, and has won. The other day two messages were sent to the same destination overseas, one by telegraph and one by pigeon. The gallant little bird arrived first, beating the telegraph by ten minutes.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

New Midget Auto

Will Be Sold Through Mail Order Houses For \$200

The New York Times says negotiations are under way for the large scale production of the new "baby" auto which would be sold through the mail order houses for \$200.

The car is the invention of James B. Martin, of Garden City, N.Y.

The feature of the car is that it has no axles in the usual sense of the word, each wheel being independently mounted in the uppermost body. Rubber "aviator cord" is used in the suspension of each wheel instead of a spring.

The new car has a wheel base of sixty inches, compared with 102½ inch wheel base of the smallest car now being produced in the United States. Mr. Martin said his invention will do 50 miles on a gallon of gasoline.

He declared he planned to have it shipped in a weather proof packing case with a hinged door which may be used as a garage.

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a shattered nervous system. And often, unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper, when it is not their fault. Their poor health is the cause. The tired, over-busy wife and mother, whose household is a scene of war, who the breadwinner whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run-down. Their nerves, like all bodily organs, need rich, red blood, in all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how this medicine ended her nervous troubles. She says: "I have suffered from nervousness and dizzy spells, and in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew steadier, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young."

You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Life Of Motor Cars

The average life of an automobile is stated to be seven years, although not many persons run their cars that long. The auto plainly is not in the class with horse-drawn vehicles which it displaced, as regards length of years. The old buggies and cabs frequently were longer-lived than their owners, and their maintenance cost was little more than the price of axle-grease, Montreal Gazette.

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

Calgary Aero Club

More Than Fifty Local Fliers Have Graduated Since Last September

With the announcement the other day that three more Calgary airmen had secured pilot's licenses, under the supervision of Inspector H. C. Ingram, inspector of Civil Aviation for Western Canada, the number of local fliers who have graduated since flying began here last September has more than passed the half century mark, so it was stated by officials of the Calgary Aero Club and the Great Western Airways, Limited.

Freemeter the Post—Remember air, poets are born, not made. Worrmore the Editor—And that's the worst feature of the situation. If they were manufactured they could be prohibited by law.

Noted Speakers Will Be Heard

Will Deliver Addresses At Annual Convention Of Canadian Chamber Of Commerce

Right Hon. L. C. M. S. Amery, Hon. R. B. Bennett and E. W. Beatty will be amongst the speakers to address delegates to the annual convention, Canadian Chamber of Commerce, at Calgary and Edmonton, September 11, 12 and 13. All speakers will conform to the general theme of "Our Canadian Economic Partnership."

Mr. Amery will speak on the British Empire's share in the partnership; Mr. Bennett on confederation as a partnership; and Mr. Beatty on the role of transportation in economic partnership. Other speakers will include Premier J. E. Brownlee, of Alberta; Hon. S. F. Tolmie, premier of British Columbia; Wm. Buterworth, president of the United States Chamber of Commerce; Sir A. W. Buchanan, owner of the Lethbridge Herald, who will discuss the share which agriculture takes; R. J. Hutchings, president of the Canadian Manufacturers' Association; H. W. Wood, president of the United Farmers of Alberta; Senator Gideon Robertson; John W. Dufosse, editor of the Manitoba Free Press.

"Why do you pay so many visits but never ask anybody to your house?"

"You see, when I pay a visit I can go when I like, but when people visit me, I have to wait until they feel like going."

A woman of Perth, Australia, has left her entire estate of \$10,000 to reduce Great Britain's national debt.

Receives New Honor

King George Confers Barony On Sir Robert Baden-Powell

King George has conferred a barony on Sir Robert Baden-Powell entitling him to sit in the House of Lords.

Lieutenant-General Sir Robert Baden-Powell founded the organization of Boy Scouts and Girl Guides in 1908, after he had had a distinguished military career in India, Afghanistan and South Africa. He received various citations and decorations for his war services and many others came to him for his work with the Boy Scouts.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

An adding machine was built in 1915 and exhibited at the Panama Exposition that had a capacity of 40 columns or within one unit of ten duodecillions.

Stop Pain

Minard's may be used internally or externally to ease pain in all parts of body.

Cut Down Food Wastage

--- by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

High Standard Maintained By Medical Profession Necessary To Retain Confidence of Public

(By Dr. Gordon Bates, General Secretary, Canadian Social Hygiene Council)

Who is a doctor?

How is that the governments and peoples of every civilized nation in the world single out one group of men—and nowadays, of women too—and say to them: "You are doctors, and in your hands we place our social and individual health. You and you alone may use the hallowed title, 'Doctor of Medicine,' and by virtue of that title, heal the sick and preserve the well."

Perhaps the best answer to that question, is this: Imagine, if you can, the condition that would exist if the medical profession were not so recognized. Suppose that any man who had the laudable ambition to heal his fellow-men of their ills—could without any supervision call himself "Doctor" and begin extorting people up and doing them with petitions of his own concoction. What an epidemic of horrible deaths there would be! How quickly the public's present profound respect for the title "Doctor" would be changed to the deepest distrust!

What, then, is the medical profession, and how does it maintain the high standard that this great public confidence demands? Let us consider what the Province of Ontario expects of a man who would practice medicine. Its requirements are typical of those of the rest of Canada.

To become a medical student, one must first pass his honor matriculation. That takes five years. After that, he must spend another six years at a recognized medical school.

It is hard to adequately suggest, in a sketchy article of this nature, the vast scope of a modern medical curriculum. The neophyte must learn physics, chemistry, biology, physiology, pharmacology, anatomy, histology (involving an understanding of the microscopic structure of the body).

From these basic studies, all of which, where they touch the human being, deal merely with the normal, the student then proceeds to pathology, the study of sickness, in its different aspects, pathological chemistry, bacteriology and immunology medicine and surgery—in all their branches, preventive medicine hygiene.

It is still harder for the reader to appreciate the vast historical background, the great wealth and richness of meaning of all of these terms; of the tremendous accumulation of knowledge that a would-be doctor must painstakingly acquire. And when he has spent six long years acquiring it, it is then customary for him to spend one or more often two years as an interne in a hospital. So that a youth of nineteen who finishes his honor matric and starts to "go through for a doctor" knows that he will be about 28 before he starts earning anything. And even then, it will take him another five years before he begins to earn more than enough for the ordinary necessities of life.

Which means that a doctor doesn't begin to earn anything to speak of as a rule, till he is thirty-three!

In the meantime, he has spent from six to eight years learning his profession, he has had to master all the old, as well as all the new branches of medicine, he has passed a number of stiff examinations,—made extra stiff in order to keep an already crowded profession from be-

coming over-crowded. (And from this extraordinary severity of examination, the general public is obviously the greatest gainer, since only the more intelligent, reliable students succeed in passing.)

He has spent an absolute minimum of \$1,000 a year for six years, including \$150 tuition, \$100 for books and equipment, which leaves very little for room, board, clothing and incidentals, to say nothing of amusements.

But in passing through those years of test, and trial, and hard work, he has become legitimate heir to all the tested medical knowledge that mankind has ever acquired and saved. The wisdom of long-dead leeches has been poured into him, and he has become greater than any of them, greater by virtue of his greater knowledge, a scientist, able to work by degrees from the known to the unknown.

And for the privileges that society accords the physician it expects, and is almost invariably accorded, a ten-fold return. There is no other division of mankind, with the possible exception of clergymen, that gives away, gratis, more of its time, energy and knowledge than do the doctors.

A doctor does an enormous amount of work for which he is not paid. Common humanity demands that he answer any serious call made upon him, at any hour of the day or night, even if he knows that the patient cannot pay. In a way this is unjust to one who is the keeper of a grocery store to give away his goods, even though there may be people starving for lack of them. Yet a doctor is expected to do just that, and in most cases he does.

In making this concession to the race generally, the doctor becomes the greatest giver of charity in the community. "Noblesse oblige" is to him no idle, elegant phrase, and it is indisputable that the profession, collectively, a great burden of healing the indigent, which belongs rightly to the state, just as the feeding of the starving is becoming recognized as a state responsibility.

And so, within the limitations of this short article, I have endeavored to establish the following facts: That every doctor belongs to a profession whose object above all other things is to heal the sick and to prevent sickness; a profession that is constantly improving itself, a profession that has produced men like Koch, Jenner, and Pasteur, whose discoveries have saved the lives of hundreds of thousands, and will save unborn hundreds of millions, a profession whose pride is in efficiency, and whose record is one of service that has been to a larger degree unselfish than that of any other mundane calling.

Failed To Work

The gentleman's dinner check was three dollars. The gentleman gave the waiter a ten-dollar bill. The waiter brought back the change on a little tray—some bills, some silver, and a small napkin, folded. The gentleman left a tip and was about to depart when he was inspired to count the change. It was a dollar short. He summoned the waiter, who began to conduct a search, which ended with the discovery of two half dollars in the fold of the napkin. This greatly surprised both the gentleman and the waiter.

Losses From Insects

The Dominion Entomologist, Mr. Arthur Gibson, estimates that in the aggregate insects cost Canada well over \$100,000,000 annually. This is the loss to field crops and to it must be added the loss to forest and shade trees, stored products, etc. While these latter losses are difficult to estimate they easily average over \$50,000,000 a year.

How Not To Keep Idle

Mayor T. H. Tyson, of Denmark, Tenn., is a busy man. He serves as notary, justice of the peace, road supervisor of this section, farmer, miller, substitutes rural mail carrier, a physician of sorts, and as a sideline sells tomatoes. He is also chairman of the Sons of Rest.

Railway Officials

Receive Promotion

Important Changes In Personnel Of Operating Department On the Canadian National

Changes of major importance in the personnel of the executive of the operating department of the Canadian National Railways in Western Canada took place on August first, according to a circular issued by Sir Henry Thornton, president, and S. J. Hungerford, operating vice-president of the company at Montreal. The changes are as follows:

A. E. Warren, general manager, Central Region, Toronto, to be vice-president of the Western Region, with headquarters at Winnipeg.

W. A. Kingsland, general manager, Western Region, Winnipeg, to be general manager, Central Region, with headquarters at Toronto.

Col. T. A. Ham to be assistant to the President, with headquarters at Vancouver; to represent the executive in British Columbia, and collaborate with all departments in matters affecting the company's interests.

A. A. Tisdale, assistant to the general manager, Western Region, Winnipeg, to be general manager, western region, with headquarters at Winnipeg.

J. R. Cameron, assistant general manager, Western Region, Vancouver, will at his own request, retire, upon superannuation after many years of service.

B. T. Chappell, general superintendent of the Saskatchewan District, with headquarters at Saskatoon, to be general superintendent of the British Columbia District, with headquarters at Vancouver.

C. Forrester, superintendent at London, Ontario, to be general superintendent of the Saskatchewan District, with headquarters at Saskatoon.

The appointment of a vice-president in charge of the western region of the company has been under advisement by general headquarters for some time, and it is a step which meets the general desire of the business men of the west. Mr. A. E. Warren needs no introduction to the west. Most of his railroad experience has been acquired west of the great lakes, and following amalgamation in 1922, he was general manager of the Western Region until his transfer to Toronto in 1926, as general manager of the Central Region.

The transfer of Mr. W. A. Kingsland to Toronto as general manager of the Central Region, will be generally regretted, even though, the change places him in charge of probably the heaviest traffic section of

Investigation By Scientists Is Under Way To Breed New Hardy Fruits For the North

the system. During this time he has been in the west, he has succeeded in gaining the confidence and friendship of the business men on all parts of the line as well as the loyalty of the entire personnel under his control. Under his guidance the lines of the western region have shown splendid financial results during the last three years, the returns for the last year being the highest in history.

The new general manager of the western region, M. A. A. Tisdale, was born in Mount Vernon, Ont., in 1874, and has been in the service of the Grand Trunk and Canadian National Railways since 1890, having worked his way by sheer ability from an apprentice in the shops at Hamilton, to the position he now holds. He has been in the west since 1909, at which time he was superintendent for the Grand Trunk Pacific at Fort William, from which post he was transferred to Winnipeg as assistant to the vice-president and general manager in 1916.

In the retirement of J. R. Cameron, the company loses the service of one of its oldest and most valuable officers. Mr. Cameron joined the Canadian National Railways as a conductor in 1889, and steadily worked upward through the operating department to the position he is relinquishing at his own request.

Like most of the other executive officers of the company, B. T. Campbell also won his way up the ladder. He has been in the service of the company since 1895, and has seen service in various capacities at Winnipeg, Fort Arthur, Ratby River, North Battleford, Vancouver and Saskatoon.

Large Co-Operative Turnover

Total Sales Of Agencies In Saskatchewan Reaches High Figure

Total sales of all the larger co-operative agencies in Saskatchewan amounted during 1928 to \$176,640,000. The volume of business transacted by producer co-operatives in Saskatchewan last year were: Saskatchewan Wheat Producers, Limited, \$160,000,000; Co-Operative Creameries, Ltd., \$5,000,000; Livestock Producers, Ltd., \$4,918,000; Co-Op. Trading Associations, \$3,852,000; Municipal Hall Association, \$1,853,000; Poultry Producers, Limited, \$553,000; Registered Seed Growers, Ltd., \$281,000; Canadian Co-Op. Wool Growers, Ltd., Saskatchewan Branch, \$180,000, a grand total of \$176,640,000.

Investigation by American scientists is under way to breed new hardy fruits which may grow in Canada's northland. This was disclosed at The Pas, Man., by K. A. Ryerson in charge of the office of foreign plant importation, United States Department of Agriculture.

Mr. Ryerson arrived in town to lead a party up the Hudson Bay line to select plants and fruits for scientific investigation. He will be accompanied by Prof. W. H. Alderman, head of the Horticultural Division of the University of Minnesota, and W. R. Leslie, in charge of the Dominion Experimental Farm at Morden.

The party expects to be gone a month and will take Churchill in their itinerary.

Mr. Ryerson explained the importance of the trip to the fruit growers of the middle western states.

"The climate of that area is such that only hardy fruits and berries can be grown," he explained. "The winters are very cold and the falls are early. To meet these conditions new fruits must be bred by cross pollination and hybridizing. The ideal plant to introduce in the north would be one that can survive the winters of the edge of the Barren Lands, and yet produce fruit," he asserted. "This trip will only be one of investigation and we expect to return here next summer and get a larger number of specimens to use in our pollination work."

Surveyors Discover

Submarine Mountains

Two New Ranges Have Been Located

Surveyors of the ocean's bed have discovered two new mountain ranges which they have accurately mapped and measured says an article in Pearson's Weekly. All the credit for this discovery is really due to the elusive subject, the echo. Shells that explode on striking a solid substance were fired at the sea bed below. By calculating the time that it took the echo of the explosion to penetrate from the bottom of the sea, the scientists on the vessel above realized that they had discovered a range of mountains capped, not by snow, but hundreds of fathoms of ocean. One of these ranges lies about one hundred miles off the coast of Ecuador and is considerably over five thousand feet in height. The other range of mountains has been discovered some distance to the north of Juan Fernandez, and rises to a height of nearly ten thousand feet!

Manitoba Poultry Marketing

When the Manitoba Co-Operative Poultry Marketing Association, Ltd., began operation in 1922, the first year's shipments totalled five cars of dressed poultry. Last year the association shipped 72 cars of dressed poultry, 10 cars of live poultry, and 135 cars of eggs to markets in Eastern Canada and the United States. The organization now has a membership of over 12,000 farmers and their wives throughout the province of Manitoba.

To Teach In Arctic

Miss Bessie Quirt, is going to Shingle Point at the mouth of the Mackenzie River on the Arctic ocean as a teacher in the first residential school to be opened for Eskimos in Canada. She will be one of a party to leave Toronto. Miss Quirt's house is in Griffla. She expects to stay for five years in the Arctic.

WORLD HAPPENINGS BRIEFLY TOLD

An amateur astronomer named Forbes, at Rondebosch, in the environs of Cape Town, has discovered a new comet. Photographs Karl Auer, Frieherr Von Welsbach, taken, it is reported, confirm its presence.

Karl Auer Frieherr Von Welsbach, inventor of the incandescent gas mantle, died recently at his residence at Welsbach Castle, in Carinthia. Auer was also the inventor of Auer gas lamps and osmium lamps.

The recently proposed flight from Saskatoon to London, England, by the new northern route are being postponed until next June, according to Ben Brotman, of Winnipeg, who is organizer of the venture.

The name of Wm. Birks, of Montreal, president of the Canadian Chamber of Commerce, has been added to the list of those who will represent Canada at the Kyoto, Japan, conference of the Institute of Pacific Relations. The conference is to be held in October.

The London Daily News says that it learns that the Royal family is somewhat anxious about the health of Prince George, young son of the King. The Prince left the navy because of his health and went into the Foreign Office. This was said not to have benefitted him, but rather to have caused his present indisposition.

The Canadian boy scouts at the International jamboree are extremely well pleased at a gift of a totem pole from Lord Baden-Powell. The carving on the totem pole represents a red Indian and a beaver together, with a snake intertwining the pole. On the rear are the words "Friendship Jamboree, 1929, R.E.P."

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

It is said that the newspapers of the United States and Canada annually use sufficient paper to girdle the world with a strip 10 miles wide.

Minard's Liniment for aching joints.

The paper made in one year would make a path a mile wide all the way around the world.

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes:—"I became very ill; lost my appetite, had cramps, diarrhoea, and severe pains in my stomach."

"I purchased a bottle of **Dr. Fowlers' Wild Strawberry** and before I had taken half of it I was completely relieved and have had no symptoms of the trouble since."

"I cannot praise 'The Extract' too highly, and will never be without a bottle of it in the house."

"It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

"Dr. Fowler's" has been on the market for the past 34 years; you don't experiment when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Guards Against Gas Explosion

New Invention Works Danger Signal and Fans Away Fumes

After the numerous gas explosions which have occurred recently in London, it was only to be expected that something would be invented to make this possibility of explosion a thing of the past. And now we hear of a little device which does away with any danger of gas escapes.

This wonderful little invention is not very impressive to look at, being just a little cylinder shaped, instrument only about seven inches high, which can be fitted wherever there is a possibility of leaking. But it only needs the very minutest escape to set this gallant little sentinel in action, when it works a danger signal, gets in touch with the nearest telephone exchange, and informs locally in power of the exact locality of the escape.

Not content with this warning, the trustworthy little cylinder sets in motion an electric fan to keep away the fumes!

What more could one ask?

Winnipeg Newspaper Union

YOUTHFUL COTTON PRINT

All the smart young folk are making this morning and sport frocks of cotton fabric, because they are so easily made, and the cost a mere trifle. Take the model illustrated in red and white printed plaid with vivid plain red bias binding emphasizing scalloped outline of side closing bodice, and edge of kimono sleeves. Why it is made in less than two hours! Only a few seams to join! Style No. 555 comes in sizes 14, 16, 18 and 20 years. Made in plain white pique for tennis, it will appear quite different. Peach shantung gingham check in orchid and white, yellow sportswear light, orange silk crepe, capucine tones in printed lawn, voile in pin check in green and white, and white angora wool jersey are stunning ideas. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Could Do Better

A small car collided with a motor-lorry, and as it was clearly the fault of the car driver, he said: "Well, all I can say is that I am sorry."

"Oh," said the lorry driver, "is that all you can say?"

"Yes."

"Well, then, you just listen to me!"

Edison Competition

Boy From Washington State Is Selected To Follow In Footsteps Of Inventor

Wilbur B. Huston, a youth from Fort Madison, Wash., was named the winner of the Thomas A. Edison competition for choice of a protégé and follower in the footsteps of the inventor.

The forty-nine contestants—one from each state and the District of Columbia—were lined up on the lawn of the Edison home in Llewellyn Park as the announcement was made by Dr. S. W. Stratton, president of the Massachusetts Institute of Technology, who was chairman of the committee.

Dr. Stratton was high in his praise of the boys, who participated in a grueling examination on subjects ranging from morals and ethics to science.

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as the summer. The excessive heat, throws the little stomach out of order so quickly that unless prompt aid is at hand, the baby may be beyond all human aid. Summer the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery, colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Reduced By Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

Ancient artists obtained their pigments chiefly from the rocks and earth.

The barking of a dog can be heard at a height of four miles.

SUNDAY SCHOOL LESSON

AUGUST 18

THE RETURN FROM CAPTIVITY

Golden Text: "Jehovah hath done great things for us, whereof we are glad."—Psalm 126, 3.

Lesson: Jeremiah 29:10-14; Ezra 1:1-11; Psalm 126:3-6.

Devotional Reading: Psalm 124.

Explanations and Comments

The Proclamation Of Cyrus, Ezra, 1:1-4.—Cyrus is called king of Persia because he was of Persian descent and Persia was the most important of his conquests; originally king only of Elam, he conquered Media, Persia, Lydia and then Babylonia. It was in the first year of his reign in Babylonia that God stirred up his spirit to the gracious thought of allowing the exiled Jews to return to their own land. Cyrus' own ulterior motive was, no doubt, to secure the gratitude of the Jews and to build up in Judea a friendly buffer nation between himself and the Egyptian power.

By heralds and by written official documents Cyrus sent a proclamation throughout all his kingdom—as far as Media, Josephus adds. It was his policy to claim the favor of the gods of the tribes of Judah and Benjamin. The desire of the Jews to return was religious rather than patriotic; the restoration of the temple was their main object. Cyrus did not order their return, he merely decreed that they might return and build the house of Jehovah. And he further decreed that the native Babylonians as well as the Jews who remained should help the returning Jews with silver and gold, and with goods, and with beasts, as well as with voluntary gifts for the temple.

The Response To The Proclamation, Ezra 1:1-11.—The majority of the Jews preferred to remain in the land of their exile, but the hereditary rulers of the tribes of Judah and Benjamin (some also from Ephraim and Manasseh, 1 Ch. 9:3), prepared to depart, and their neighbors strengthened their hands with gifts, as Cyrus had directed.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

The Chinese land covers one-quarter of Asia, from the Pamir mountains to the Pacific, and from Siberia to India.

Co-Operative Wool Growers

Heavy Consignments Expected This Year From All the Provinces

"This is going to be a heavy consignment year for wool from all provinces," said H. J. Tisdale, of the Canadian Co-Operative Wool Growers, upon his return from an extensive tour of the west. After a month in the principal sheep raising areas Mr. Tisdale estimated that the total of western shipments to the Wool Growers this year will amount to around 2,800,000 pounds divided as follows:—British Columbia, 400,000; Alberta, 1,500,000; Saskatchewan, 600,000; and Manitoba 300,000 pounds.

Recipe For a Delicious Uncooked Salad Dressing

To add fastness to the salads and green vegetables which are both cheap and healthful at present, the following salad dressing recipe is much prized:

- 2 eggs beaten until light.
 - 1 teaspoonful salt.
 - 1 teaspoonful mustard.
 - 1 cup vinegar.
 - 1 can Eagle Brand Milk.
- beat vigorously all the ingredients except vinegar, for a few minutes. Add vinegar, stir well and set aside for a few hours to thicken. This dressing will keep for weeks.

Quebec Had Snow In June

Five different blizzards, reported since in the month of June, The Gouin dam in the Lake St. Peter region headed the list with a two-inch fall during the 30 days of the month. Theford Mines ranged to the other extreme, for, in addition to recording traces of snow, it also registered the hottest day of the entire month, the mercury soaring to 96 degrees on June 20.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light hit strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economic, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, greenhouses. It keeps out cold—will not crack, or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but width of 36 inches only. One square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 120 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, F.O.B., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight Send for booklet "WINDOLITE"

PER CAPITA SALE OF LIQUOR IS IN EXCESS OF \$10

Ottawa, Ont. —Liquor sales in 1928 through provincial government stores totalled \$107,694,384—rather more than \$10 per capita over all Canada.

Figures on the liquor traffic in Canada, covering sales in eight of Canada's nine provinces, were released by the Dominion Bureau of Statistics. Government control is in effect in all provinces excepting Prince Edward Island and Nova Scotia.

Total government revenue from the liquor traffic during 1928 amounted to \$72,660,501.

Of this amount, \$49,805,291 rolled into Dominion coffers, while the remainder \$22,755,201 accrued to the provinces. Actually, the latter figure does not include all profits of liquor control boards.

Less than one-third of Saskatchewan's total liquor board revenues appears under ordinary revenue, while more than \$400,000 distributed to municipalities does not show in British Columbia.

Ontario and Quebec record by far the highest revenue totals among the provinces, their combined total aggregating two-thirds of the Dominion's aggregate. Ontario's revenue amounted to \$5,130,390, and Quebec's to \$7,000,000. Alberta with \$2,765,000, and British Columbia with \$2,762,229, are next, though the former total actually includes the revenue for 15 months.

No single province among the remaining ones showed a revenue for 1928 amounting to more than \$1,000,000. Manitoba, however, had a total of \$926,163, and the totals would have been much larger but that the breweries in that province are permitted to sell beer direct to permit-holders. Other provincial revenue totals are: Saskatchewan \$600,000; New Brunswick, \$335,027; Nova Scotia, \$244,391.

Seven provinces are represented in the figures of gross sales reported by provincial liquor control boards—Prince Edward Island and Nova Scotia being omitted. Ontario's total is double that of the next highest, Quebec, amounting to \$48,905,591 of the Dominion aggregate of \$107,694,384. Quebec is next with \$24,229,624. British Columbia and Saskatchewan are the only other provinces whose sales grossed more than \$1,000,000, the former reporting \$1,859,910 and the latter \$11,708,534.

Plan New Air Route

Chicago To Puget Sound Via Western Canada Airways

Chicago—Chicago will be brought to within 22 or 23 hours of Puget Sound cities along the northwest by a new all-air passenger route, Col. L. H. Britten, general manager of Northwest Airways, announced here. Britten said an agreement has been reached with Western Canada Airways, Ltd., which plans to operate along the southern Canadian border from Winnipeg to Banff and Victoria, whereby Northwest Airways will extend its line to Winnipeg and make connections with the Canadian company.

Making Trip To Coast

Ottawa.—Hon. Jean Knight, French minister to Canada, has left on a three-weeks' trip to the Pacific coast. The trip will mark his first visit to Vancouver since his appointment last October. The minister will stop off at Winnipeg, Regina, Calgary, Edmonton and Victoria. Hon. Mr. Knight will speak at a number of Canadian clubs and chambers of commerce in the west.

May Import Welsh Coal

London, Eng.—There is a likelihood of an increase in the exports of Welsh anthracite to Canada, amounting to 2,000 tons a year, as a result of the forthcoming visit to the Dominion of Right Hon. J. H. Thomas, Minister of Employment, according to The Manchester Guardian.

W. N. O. 1798

British Atlantic Fleet

New Becomes the Greatest Single Fighting Force in the World

London, Eng.—The Atlantic fleet becomes the greatest single fighting force in the world by the decision of the Admiralty to recall five battle-ships of the Queen Elizabeth class from Mediterranean waters to home ports and the Atlantic fleet.

The transference of the battle-ships, not only an important change in distribution of the navy, but an entirely new departure in British naval policy, means the balance of power is removed from Malta and Gibraltar to the Atlantic.

The Atlantic fleet will consist of 14 capital ships, among them the two most powerful vessels in the world, the Rodney and Nelson, and the largest battle cruiser in the world, H.M.S. Hood.

The Queen Elizabeth vessels are approximately 30,000 tons, armed with eight 15-inch guns. These five will join the two Nelson class vessels, the Hood, the four Iron Duke battle-ships and the battle cruisers, Renown and Repulse, to make the most formidable fleet assembled on peace time duties in the world.

To Halt Liquor Smuggling

Federal Government To Co-Operate With U.S. In This Connection

Ottawa.—The Dominion Government is studying ways by which it can more effectively co-operate with the United States in the suppression of liquor smuggling across the border. The question was again brought before the cabinet at a recent session.

At the conclusion of the meeting, Premier W. L. Mackenzie King said:

"Since United States have become active themselves in preventing liquor smuggling, it seems appropriate further measures of co-operation should be considered by the Canadian Government." The prime minister indicated there might be an announcement in a few days of new regulations in the way of co-operation in suppressing the traffic.

New York Opposing Italian For Mayor

Tammany Hall Fighting Election Of Congressman La Guardia

New York.—There are 392,225 foreign born Italians in New York City, and 410,721 whose parents were foreign born. That's one reason why Tammany Hall is snapping into action, deploying its forces and getting set for a devastating fight against Fiorella H. La Guardia, who was grudgingly handed the nomination for Mayor of New York at the Republican city convention.

Congressman La Guardia is a formidable campaigner. His verbal attacks can raise blisters like the bull whip. For months he has been indefatigably at work, fanning up his Latin legions, from bootblacks to bank officials.

New Manitoba Industry

Plant To Manufacture Explosives May Be Built Soon

Winnipeg.—The Manitoba Free Press publishes the following:

"Rapid development of mines in northern Manitoba has led Canadian Explosives division of Canadian Industries, Limited, to purchase approximately 1,000 acres of land in the vicinity of East Selkirk, 18 miles north of Winnipeg, upon which to erect an explosives plant. The enterprise involves an investment of approximately \$750,000.

"Date of construction of the plant is contingent upon mining developments, but it is expected that work will begin early next spring and the plant will be producing before the end of 1930."

Patrol Ship Returning

Ottawa.—The Canadian patrol ship "Boothie," has reached the northern apex of her summer voyage with the Department of Interior's 1929 expedition. She reached Bache Peninsula, Ellesmere Island, the most northern police post and post office, on August 3 and is now heading south, bringing out Inspector A. H. Joy, of the Canadian Mounted Police, who recently completed a northland patrol of 1,800 miles.

POPULAR FIGURE IN LONDON SOCIETY

Lady Lettice Lygon, daughter of the Earl and Countess Beauchamp, is a popular figure in London society. A feminine journalist, she is famed for her beauty and wit.

The "I'm Alone" Case

Eminent Counsel For Canada and United States To Act As Arbitrators

Ottawa.—Canada has elected Eugene Lafleur, D.C.L., LL.D., K.C., eminent counsel of Montreal, as Canadian arbitrator in "I'm Alone" case. The government of the United States has appointed Willis Van Devanter, associate judge of the Supreme Court of the United States, as its member.

Announcement of the selections was made simultaneously in Ottawa and Washington.

At the same time, the Department of External Affairs at Ottawa, announced that John E. Reed, K.C., of the Nova Scotia bar and legal adviser of the department, had been appointed Canadian agent in the case.

Counsel for the Dominion of Canada in the case are W. N. Tilley, K.C., of Toronto, and Aime Geoffroy, K.C., of Montreal.

At the Department of External Affairs it was announced recently that there would probably be a lapse of some time before the arbitrators in this famous case actually open sittings. Counsel for both parties will have to get to work on the case, and there must be an exchange of pleadings, which may occupy considerable time.

Not until the preliminaries have been disposed of will there be a definite decision as to the place or places where sittings will be held. It has been taken for granted that some of the sittings at least will be held in Washington, but there is a possibility that there will be others, possibly some in Ottawa.

Eight Killed In Riots

Julie Mill Strikers In Calcutta Clash With Police

London, Eng.—Calcutta despatches to The Daily Mail said eight persons were killed and 50 injured in a fight between Julie mill strikers and watchmen and police at Nalhai, 240 miles north of Calcutta.

A strike has been in progress for several weeks in the area after workers protested introduction of the sixty-hour week.

Forty per cent. of the looms in the Calcutta area are stopped, and about 12,000 workers made idle.

WON HONORS AT BISLEY MEET

The photograph here shows: (1) Lieut. Desmond Burke, Ottawa, who after a tie, lost the King's prize to Lieut.-Col. R. M. Blair (3), Vancouver, at the empire meeting of the National Rifle Association, at Bisley, England; and (2) G. M. Ennis, C.S.M., Toronto, who won the Corporation of the City of London Cup.

British Airship May Be Zeppelin's Rival

Hope Machines Nearing Completion Will Be Much Faster

London, Eng.—Cabled reports from Lakehurst that the Graf Zeppelin's successful trip to America probably would be followed with establishment of a regular trans-Atlantic air line brought considerable speculation in London morning papers as to the possibility of British competition.

Greater speed or at least a cut in elapsed time of the trips was held to be a necessity for success of such a line and the hope was expressed that two British giants now nearing completion, the R-100 and R-101 would prove much faster.

Sir Dennis Burney, M.P., head of the company which built the R-100, in a talk with the Daily News opined that the Graf's time did not give margin enough over fast steamers and an airship to be successful must be able to do a trip in sixty hours outward and 48 returning. This would imply a cruising speed of 90 miles an hour.

Resignation Of Grain Board

New Members Will Be Appointed At An Early Meeting

Ottawa.—All the members of the Board of Grain Commissioners for Canada have resigned, their resignations to take effect August 15. On that date the names of the new commissioners will be given out.

Announcement of the resignation of the members of the grain commission was made by Hon. James Malcolm, Minister of Trade and Commerce, at the close of a cabinet sitting here.

Mr. Malcolm said that the new commission would make its own selections for the posts of assistant commissioners after it was appointed.

The resigning members of the grain commission are: Chief Commissioner L. H. Boyd, K.C., and Commissioners Matthew Snow and James Robinson.

The new board will also consist of three commissioners, but four assistant commissioners will also be appointed.

New Administration

Has Assumed Office

Took Oath Before Premier S. F. Tominé At Victoria

Victoria.—Right Hon. Francis Alexander Anglin, P.C., Chief Justice of Canada became administrator of the Dominion of Canada when he took oath of office in the office of Premier S. F. Tominé, of British Columbia here. Following the investiture, His Excellency issued a proclamation announcing his assumption of office as administrator of the Dominion. A second proclamation appointed Hon. Mr. Justice P. B. Mignault, of Montreal, as deputy administrator, invested with authority to sign documents of urgent character.

Noted Aviator Visits West

Winnipeg, Man.—Going to the Pacific coast on a trans-continental air tour, Captain J. H. Parkinson, noted Canadian pilot, of Montreal, Quebec, left Montreal, July 12, and has made 13 stops at various eastern cities and towns. En route to the Pacific coast, the Montreal aviator will visit various prairie cities.

ANGLO-EGYPTIAN DRAFT TREATY WELL RECEIVED

London, Eng.—British military occupation of Egypt, except for the Suez Canal zone, is abandoned and other important and far-reaching reforms agreed to in the new Anglo-Egyptian draft treaty, details of which were issued from Downing Street by the foreign office.

The proposals are a great advance on anything hitherto offered as settlement of the Anglo-Egyptian problem, being considered even more favorable than was the draft treaty of 1927, which was rejected by the Egyptian Parliament under the influence of the followers of the Nationalist leader Zaghoul Pasha. The agreement, which Right Hon. Arthur Henderson, foreign secretary, has negotiated with the Egyptian Premier, Mohammed Fawzi Mahmud, in a general way follows the lines of the abortive treaty of two years ago, but makes important concessions to Egypt.

The British occupation will cease and British troops will be withdrawn to the Suez Canal zone.

The British Government will use its influence to induce other powers to consent to the abolition of the stipulations of extra-territorial rights and will assist Egypt to become a member of the League of Nations.

Further, Great Britain recognizes that the protection of foreigners in Egypt is a matter devolving solely upon the Egyptian government. The protection of minorities was one of the "reserved" points of the British Government two years ago, but it is now admitted that this will be exclusively concern of the Egyptian Government. The variations of 1927 will give Egypt a greater measure of real independence rather than ever before proposed.

The most important concession on Great Britain's part is the withdrawal of British garrisons to the canal zone. This was refused in the negotiations with Sarwat Pasha two years ago. Sir Austen Chamberlain, then secretary of state for foreign affairs, held out this as a possibility ten years hence.

Mr. Henderson in a note to Prime Minister Mahoud, stipulates that these new proposals must first be approved by the newly elected Egyptian Parliament before they can be submitted to the British Parliament for approval and embodied in the treaty.

Canadian Authoress Dead

Native Of Winnipeg Well Known To Public Few Years Ago

Chicago, Ill.—Mary MacLane, a successful author 15 years ago, died August 6, in a lonely room on the fringe of Chicago's black and tax belt. She was born in Winnipeg, Man., in 1881.

Author of "I, Mary MacLane," "Men Who Have Made Love To Me," and other romantic writings, Miss Mary MacLane had virtually disappeared. It was some time after her death before it was realized that she was the Mary MacLane whose own romantic adventures as set forth in her books had stirred the imaginations of the reading public of a few years ago. No one was at her bedside as she died. Her body was found by the proprietor of the small hotel where she had lived for the last four years. Her death, a doctor's certificate said, was due to natural causes.

Miss MacLane's retirement about six years ago was believed to have been caused by disappointment. It came after the sale of her new books, had fallen off and financial reverses set in. Ill-health added to her troubles.

Drops Freedom Of Seas Issue

Toronto.—A special dispatch to the Mail and Empire from Washington says: President Hoover has dropped the freedom of the seas issue out of his disarmament program, not only on the theory that it does not fit with the Kellogg anti-war treaty, but because he believes naval parity with Great Britain is the only real guarantee of freedom of the seas.

(360)
Locomotive Number 5300, one of a fleet of twenty monster oil-burn-
ing engines for use by the Cana-
dian Pacific Railway on passenger
and freight service in the pro-
vinces of British Columbia, was re-
leased from the Montreal Lo-
comotive Works and was on display
in the Windsor Stadium, St. Louis,
Montreal, recently. It was viewed
by a constant stream of specta-
tors all day, who admired its 95 feet of
length, its huge proportions and its
generally handsome appearance.
This locomotive is the greatest in
the British Empire.

The total number of dairy fac-
tories in operation last year in
Canada was 2,835, comprising 1,565
creameries, 1,302 cheese factories,
288 combined butter and cheese
factories, and 29 condensaries.

The Royal York Hotel, Toron-
to, was a blaze of color at the recent
rose show held there in July. The
blossoms ranged from the pure white
of large dimensions and the smaller
varieties to the vivid red of Ameri-
can Beauties and others. The
ball room of the Royal York was
filled with them at the Ontario Ex-
position Society show. The display gave
birth to the project of having the
most beautiful rose garden in the
world laid out on the Canadian-
American border and a committee
was appointed to consider the plan
and to settle final details at a
meeting at the Royal York next
month.

Announcement has been made
that Americans and Canadians will
join in travelling to the World's
Poultry Congress to be held in Eng-
land in 1930. Delegates will meet
at Montreal and will travel via St.
Lawrence route overseas. It is
expected that nearly 1,000 delegates
will make the trip.

Canada's wool crop, like the grain
harvest, moves across the country
in a great wave, not being a simul-
taneous operation in all provinces.
It begins in the elevated valleys
of British Columbia and moves
steadily across the Prairies. The
shearing is at its height early in
June and is about completed by the
end of the month. The crop
ranges from 15 to 24 million lbs.
yearly and is marketed largely
through the Canadian Co-operative
Wool Growers.

Canadian Pacific farm sheet
swept the board at the Edmonton
show recently with three champion-
ships including the any age Suffolk ram
and ewe. Other wins including
nineteen were credited to the
Experimental Farm at Strathmore
operated by the Canadian Pacific
Railway.

Two employees who have to-
gether completed over one hundred
years in C. P. R. service were com-
plimented by E. W. Beatty, chair-
man and president of the company,
during his recent tour through
the Maritime Provinces. They
were Charles Henderson, who ac-
ted as conductor on the president's
special and who started railway
work in 1875, and Harry Saunders,
engineer of the special, who has
been in the company's service for
48 years.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Marcus, the famous Broadway producer, takes a party of four to Blackie Joe's New York night club. Al Stone, Blackie's chief comedian and singing waiter, is desperately in love with Molly, the ballad singer, but she scornfully rejects him. Then she goes to the Marcus table and tries to ingratiate herself with the great producer. In a despairing effort to touch her heart, Al goes on the floor and sings a love ballad he has written for her. The song is a sensation and Marcus consents, Grace, the cigarette girl, who is deeply in love with Al, is in the background.

CHAPTER VIII.

As Al heard Marcus's words he turned, quickly and beamed on Molly. He realized he had won—Marcus would not only take the song, but he would make Molly a headliner. Tears of excitement and gratitude filled Molly's eyes. After all, she was not a woman of stone; she did appreciate the gallant stand her singing waiter had made in her behalf.

Now Al became aware of a clatter behind him, in front, and all around. The crowd saw him, Al Marcus's table and refused to be cheated of its encore. The applause was deafening, the customers were pounding on the tables, and their voices came in monotonous, insistent, rising chorus, "We want Al, we want Al, we want Al!"

Al rose and looked around. "You'll have to give 'em an other," said Marcus, smiling. "Have you any more songs ready?"

"Yes, I have others," Al replied. Then he saw Blackie approaching. "Can't you give them something else?"

Felt Tired and Miserable

"I took Lydia E. Pinkham's Vegetable Compound for miserable and tired feelings and it gave me strength to do my work. My nerves are better and I feel well and strong and have a good appetite. I sleep well and am in pretty good spirits and able to work every day now. I recommend the Vegetable Compound and you may use this letter as a testimonial."—Miss Delvena Wallace, Union Street, North Devon, New Brunswick.

Lydia E. Pinkham's Vegetable Compound

W. N. U. 1798

Al nodded and Blackie advanced to the center of the floor.

"Ladies and gentlemen" — his powerful voice filled the room. "Mr. Al Stone, the world's premier singing waiter, is going to entertain us with another number of his own composition in response to the insistent demand. I wish to thank you in behalf of Mr. Stone and the club for the rousing reception you have given him."

Again Al advanced to the piano, drew from his pocket a number of ballads, and selected "I've Got a Rainbow Round My Shoulder." Could he put this one over too? Yes, he was sure he could — so quickly is self-confidence born as soon as success is once achieved. And, true to his feeling, he swept through the song to another triumphant conclusion, while Molly's eyes remained fixed on him in rapturous admiration.

Now the night was ended at Blackie Joe's—Marcus and his party had gone and the last of the other customers had vanished too. Waiters were hurriedly piling chairs on tables, scrub-women appeared with buckets and mops; lights were dimmed.

In a tiny dressing room at the back of the building, Grace, the cigarette girl, had taken the tray from her shoulder, balanced her account for the evening and slipped into simple and inexpensive blue serge dress.

Generally Grace had a good natural color, but this morning the pale sunlight, slanting through her dressing room window, revealed her face as dead white. So she put on more rouge than usual, to accentuate the brave front she felt she must assume. Yet as she pulled her tight-fitting little blue velour hat down over her dark hair and slipped into her coat, these words were beating in her brain:

"He's in love with Molly—and he means to marry her!"

Over and over again the words sounded, like a dirge. And they seemed to take on rhythm, the rhythm of "Always" the love ballad Al had sung to Molly.

Grace heard footsteps in the hallway and turned to confront Blackie Joe. There was good old stout Blackie, gazing at her with kindly eyes. Finally he said:

"How do you feel, little one?"

"Oh—so-so." She couldn't say she felt splendid; she didn't have the strength to say it, and she knew Blackie wouldn't believe it.

"Listen, Grace," suggested Blackie, "don't take things so hard. I know how you feel toward Al; don't you think I've been watching you and sympathizing with you? But you're beating your head against a stone wall."

"I know it." Grace tried desperately to keep her lips firm. "I've thought things all out—I realized tonight there wasn't a chance for me. But I can't stop loving him just because he loves Molly."

"You can't now, at this moment, maybe," answered Blackie, "but you'll be able to, soon. You're only a kid, and you'll find someone else. I know—I was once a kid myself. With me it was on with a new one and off with the old one every month or two."

"That may be true of you," said Grace, wearily, "but I think I know myself. I'll bet you I never love anyone but Al—I know I won't."

Blackie laughed, came over and patted her on the head.

"But don't you tell Al about that!" continued Grace, with passionate emphasis. "I don't want him to know how I feel toward him—it would spoil his happiness. And, above all things, I want Al to be happy! He's been wonderful to me—why, he's the

best, kindest, best-looking man in the world. Promise me you'll keep mum about me, Blackie?"

"Not a word, kid," said Blackie reassuringly.

"I know how he feels towards me," Grace went on. "I'm just like a younger sister to him. I wish him all the happiness in the world—I know he'll be leaving us. I've lost out forever—and that's that."

"Don't be too sure," Blackie remonstrated.

"What do you mean?"

"I don't mean nothin' except—well, forever's a long time."

Grace rose and moved listlessly toward the door.

"Thanks for taking an interest, Blackie. See you tonight. So long."

"So long." Blackie looked after the sagging little figure that was usually so lithe and vibrant with vitality. He shook his head sadly. Grace, passing through the serpentine corridors, heard voices—the voices of Al and Molly. They were talking in Molly's dressing room. She did not mean to listen, yet she stopped as she heard Al say enthusiastically:

"We can't lose, Molly. Marcus will sign us up tomorrow and we'll move over to the bright lights and the big money. Then we'll get married. That will be the happiest day of my life, darling!"

"Yes," came Molly's eager voice, "we'll get married and we'll go to the very top. Al, I've always known you had it in you. When I heard you sing tonight I was sure!"

The faint flicker of an unbelieving smile crossed Grace's face, but she made no sound. Then came Molly's voice again:

"We'll leave this dirty hole cold—right away—tomorrow."

At this, Al paused. Then he remonstrated.

"So soon, Molly? That wouldn't be fair to Blackie. He's done a lot for you and me. It's true I thought of quitting tonight, but that was because I believed you didn't love me. And I couldn't stand the thought of staying. Now it's different; let's give Blackie some notice, be square with him the way he's been with us. After all, he's had faith in both of us."

"Oh, all right," agreed Molly grudgingly, "but I hate this tough place."

Suddenly Grace ran in the other direction, through the corridors, across the deserted cabaret room, down the dark, shabby steps to the sunlit street. Her heart was thumping madly and she wanted to get as far as possible from their voices. Her woman's intuition made her fear for Al's future with Molly; something in the girl's insensitive attitude and words harried her.

She hurried along the narrow streets toward her lodging house in the Village, several blocks away. Her thoughts were full of Al and her love for him; she realized that if she didn't reach home quickly she would burst out crying on the street.

When she stood in her bleak, shabby, lodging house bedroom, and confronted her reflection in a mirror, she cried passionately:

"That girl's no good! She'll never make him happy! And, oh, I love him so! I would have worked so hard to help him!"

(To Be Continued.)

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

Okanagan Valley Fruit

Fruit conditions throughout the Okanagan Valley are promising. There has been some drought injury to apples and some hail damage, but on the whole the yield is expected to be a satisfactory one. Onions also are making a good yield.

Spanish applause consists of a peculiar hiss.

Little Helps For This Week

"Whoso trusteth in the Lord, happy is he.—Proverbs xvi. 20.

The child leans on its parent's breast, Leaves there its cares and is at rest; The bird sits singing by its nest,

His trust in God, and so is blest 'Neath every cloud.

The heart that trusts forever slays, And feels as light as it had wings; A well of peace within it springs, Come good or ill.

What's'er today, tomorrow brings, It is His will.

He who believes that God's will always must be done prays not when this or that event arises, but ever prays that, more and more, he may come into harmony with it. And out of this constant prayer of the soul that desires not gifts from, but communion with the Giver, there comes a sense of trust.—Francis B. Hornbrooke.

As Itemized

The expert had been called in when the factory motor broke down. He took one look, made two taps with a hammer and started it in perfect order. The owner was indignant to get a bill for \$50, and demanded an itemized account. He got this:

Tapping with hammer.....\$ 1.00
Knowing where to tap.....49.00

Total.....\$50.00

A Giant At Ten

Although only ten years old, Robert Wadlow, Racine, Wisconsin, has reached the stature of a well-developed man. He is 6 feet 10 inches tall and weighs 250 pounds. Special shoes built for him, size 25, were made from five square feet of leather. Physicians say he will grow to be nine feet tall.

The Man For The Job

The Department Manager: We'll have to fire that new salesman. He's asleep most of the time.

The General Manager: No, don't fire him. Send him up to the clock section. We can use him there demonstrating alarm clocks on him.

Early oil wells at Baku were scooped out by hand.

Injured in Auto Accident.

An accident which may be charged up to the credit of the new narrow grade on the Highway occurred Saturday night opposite the residence of Mr Dan Brox, on the Baseline, when an innocent pedestrian had his leg broken as the result of a misunderstanding between two motor vehicle drivers.

Mr Jacob Pepernich (who has been in the employ of Mr W A Ries) was proceeding to the Grove at the time, with two companions. When the trio reached the spot indicated the roadway seemed to be obstructed with a motor truck and a car, each apparently endeavoring to pass the other.

The trio took to the ditch at the roadside, to effect a passage. While they were there, it is charged the car left the roadway and came, also, into the ditch. Whereupon Jacob and his friends tried to climb the far bank, to escape the oncoming car. Two of them succeeded, but Jacob's foot slipped and he fell down. The car passed over his left leg, breaking it.

Jacob was taken to Stony Plain, where the fracture was set by Dr Walton. An ambulance was summonsed from Edmonton, and the patient conveyed to one of the hospitals there. The accident was reported to the Provincial Police at Edmonton.

Construction Begun.

The Calgary Power Co. has sent a consignment of material to Stony. On Monday the erection of poles was commenced on the proposed line. The company's power line is leaving Edmonton via Alberta ave., following this route west to the School road, thence south to Loeblich's corner. From this point a branch will run east to the Grove. The main line will run south to the old C. N. right-of-way, which the line will follow to Stony, entering this town at the Davis corner, and thence along Railroad av.

Sporting Notes.

Stony Plain's baseballers played two games at Evansburg on Sunday. The first game was with the Coal Town team, which game the Stony players won. Follows this, our balltossers played a team from Junkins. The team from the latter town was too good for the Stonies, and the Junkiners captured this game, but by a small margin. Our team had motored up, and returned late Sunday night.

A good example is sure the best sermon.
Ho hum! only a few weeks more 'till school opens, and then us parents will have to begin again on the homework.

At the Bar

Tuesday was another busy day for Magistrate Williams. The evidence in the Bigelow case was concluded and the Magistrate reserved judgment. The Nick Pasemko vs. J Potchkaroff case was dismissed, with costs against the complainant. The George F. Meisner affair was adjourned to the 20th, when it is probable the defence will be ready to proceed.

Church Services

A Lutheran service in English will be held in Stony Plain next Sunday at 7.30 p.m., by Rev. Osterman.

Service at United church Sunday evening at 7.30; Rev G A Sauder.

Services were held on Sunday last in St Philip's Church by Rev C Keenan.

Spruce Grove News

Scoutmaster Gibson returned on Monday from a vacation spent at Jasper.

Clarence Brox was taken in to an Edmonton hospital on Friday, suffering from injuries to his head.

The annual summer discussion on incorporation proceedings for the hamlet has started. Some of the residents are strongly in favor of breaking away from the municipal district and incorporating as a separate unit. The recent rise in the local assessment, with the consequent increase in the tax rate, has something to do with the movement.

The young athletes at the local school are pleased that the school grounds have been leased for pasture, and expect that the rent for same will be turned over to them, with which to purchase basketball equipment.

Carvel Clippings

Rose Mawer, beloved wife of G M Mawer, of this district, passed away at her late residence, Thurs. Aug. 8, in her 63d year. Deceased had been a resident of this district for the past five years, where she was well known and highly respected. She is survived by her husband and one daughter, Mrs S E Seward, of this district. The funeral took place Friday afternoon from the family residence. Interment was made in Duffield cemetery.

Wenn die Katze fort Ist, Tanzen die Mäuse!

Whether the fact that the regular constable is away at the present time has anything to do with it, is hard to say, but complaints are being made regarding the amount of drunkenness and disorderly conduct to be seen on the streets these nights. In fact, one man who has been sizing up the situation says the town is ripe for local option right now.—Leduc Representative.

Ford

The Finest Car Made at a Low Price.

Back of the new Ford are manufacturing and production methods, as unusual as the car itself. Without these it would be impossible to give you the value that is in the New Ford. Because of them it is unquestionably the best motor car that can be made at a low price without sacrificing quality anywhere on it. We make immediate deliveries on all models.
